

```
package jom;

class For{
    void tata() {
        System.out.println("new ceo");
    }
}

class how extends For{
    void tata() {
        System.out.println("tata brother as new cceo");
    }
}

public class Ov {

    public static void main(String[] args) {
        how h=new how();
        h.tata();
    }
}
```
